Value Doors**

Why Value Doors?

When investing in improving or expanding your home, you want to ensure your investment is in good hands.

Here at Value Doors, we focus on meeting your needs and wants. We do this by letting you customise your door, from the choice of door type to the kind of letterbox you would like to add.

We can deliver and supply throughout the UK*. This is due to having approved and highly experienced installers throughout the UK. Because you are in control of the whole process, if you have a supply-and-fit door, one of our installers will double-check the door's measurements just to make sure it's a perfect fit.

No job is too big or too small. Our team are here to help you through the whole process, so if you ever get stuck or need a helping hand we always have someone ready to take your call.

Customer Satisfaction

Read our customer review on Trustpilot.

Finance options

Various payment options available to suit your needs.

Hassle Free

We will only contact you once the door is made and you are ready to pay.

Sustainability

Every order we have we plant a tree in areas at risk of deforestation.

48mm Timber Core Door/ French Door/ Stable Door/ Back Door

What makes the door

Solid timber core
Solid Core doors are constructed with sixteen layers of laminated timber to prevent warping or splitting caused by the grain running in one direction. The timber core is cross-reinforced.

Flag and Butt Hinge
The standard butt hinge is used on our composite doors and used on Bi-fold doors.

Threshold
Standard and other options available - (Disability access)

Auto-Fire Locking system
An automatic multi-point locking system featuring three self-locking deadbolt latch to provide additional security. The lock has undergone rigorous testing of over 50,000 cycles and is fully compliant with PAS-24 security standards. *There is a different locking system on stable doors.

Cycle
comes with the latest auto-fire multi-point lock technology that automatically engages when the door is closed. - This is to reduce the affects of wrapping

Timber Core

Revolutionary, high-performance CoolSkin technology to withstand extreme temperature to withstand extreme temperature changes and maintain optimum performance.

Revolutionary, high-performance CoolSkin technology to withstand extreme temperature changes and maintain optimum performance.

Premium cross-laminated Albasia Falcata timber core that is thermally efficient and offers maximum security.

Bifolds (configuration)

Aluminium

Bifolds

Aluminium doors are renowned for their exceptional durability and resistance to harsh weather conditions. They are designed to last for decades, making them a reliable choice for any home or building. The material is incredibly strong, providing a high level of security.

Thanks to advanced thermal break technology, aluminium doors are also among the best-insulated options available in the market. Moreover, they require very little maintenance to ensure optimal performance and to keep them looking new.

All our aluminium products are listed and comply with Document Q. This ensures the security of homes and buildings by making sure that all entry points, such as windows and doors, provide a certain level of security against casual intruders.

Advantages

- Maximises the light coming into your home
- They allow you to bring the outside in
- Aluminium Bifold are incredibly strong
- Require little maintenance
- They are able to add value to your home
- Extra security for your home

Aluminium

French Doors

Aluminium French doors are a stylish and practical addition to any home. They are known for their sleek and modern appearance, providing a touch of elegance to a property's interior and exterior. These doors offer a seamless transition between indoor and outdoor spaces, allowing natural light to flood into the room.

Additionally, aluminium French doors are highly durable, secure, and energy-efficient, making them a popular choice for homeowners looking to enhance both the aesthetic appeal and functionality of their living spaces.

All our aluminium products are listed and comply with Document Q. This ensures the security of homes and buildings by making sure that all entry points, such as windows and doors, provide a certain level of security against casual intruders.

Advantages

- 10-year warranty on factory powder coating and hardware.
- Engineering-grade hardware for smooth operation.
- Weather-rated standard threshold prevents rain entry.
- Super slim sight light maximizes light and views.
